Sixty millions of dollars were earned during 1895 by wage earners in the building trades alone. The portion of this not consumed (popularly termed "savings") should certainly have some representation in this city's real estate to the development of which it has so largely contributed. The wage earners have put their money in watered stocks or in gloomy vauits—but nothing has gone into the great natural security, the land, or into the most stable of all investments, the buildings of our great city. The Cass Reality Corporation offers the first opportunity which has been open to the person of small means to invest in New York City real estate. This is done by bringing together many small sums, each sharing in the bene-sail at \$55 to cleth. So sheems, \$6,50.
